[Despatch Abstract.]

Jail — Supplies — Silk filatures at Kolhapur —
Electrification — Plans and estimates
Proposals of the D.I.T.C — Sanctioned.

D.O.No.2200-D/42.

Director of Industries & Commerce,
Madras, 29th March 1943.

6102

My dear Sivasanker,

Subject: Electrification of the Kollegal Silk Filatures Ltd and the Government Silk Filatures at Kollegal.

In connection with the electrification of the Kollegal Silk Filatures the question of change over from steam engine drive to electric drive has been considered. The Second Adviser to His Excellency the Governor of Madras when he visited Kollegal on the 18th of March 1943 suggested that for the present there was no need to effect this change over. Peychaud who is now in charge of the Filatures has sent me a note on the subject from a perusal of which it is clear that it would be advantageous to effect the change over when electrical energy is available. I would like to have the very early orders of Government on this matter to enable me to place orders for the motors required since the position of electrical equipment and material is ever changing from day to day.

Yours sincerely,

A Chadah

T. Sivasanker, Esq., I.C.S.,
Additional Secretary to Government,
Development Department.

Copy of note by R.Peychaud, Esq., Deputy Director, Textiles, Supply Department.

STEAM DRIVE.

From experiments, I have carried out, I find that the steam required for driving 75 basins is about 100 lbs of steam. This will probably be doubled when 150 basins

6602 D/43

work or in terms of fuel will about to roughly about ½ ton of fuel a day.

In addition to this, about one gallon of Lubricating oil and 2 lbs of grease are consumed for the St Engine per week. In addition to this, one man has to be in constant attendance to regulate the speed of this engine.

In terms of value, fuel will cost about Rs.7/- per day for half a ton and Lubricating Oil and grease about Rs.6/- per week.

Electric Drive.

Electrical drive has the great advantage of being steddy in its drive which is a great advantage over steam. Therefore, after comparing with all the figures of cost and other advantages, I am definitely of opinion that Electrical drive should be used.

* * *

This is a matter of forming my opinion. A decision as to whether we should or should not change over to electrical drive may be taken when a Reliable Concern for Converting 25 ~ Cycle Current to 50 Cycle Current becomes available.

[illegible]

No objection to this putting in El drive if the equipment can be obtained & the cost is not excessive

To Addl C.S

Dear Sir.

Sub: Kollegal Silk Filatures Ltd – Change over to electric drive.

Ref: Your D.O. No 2200 T/42 d 29.

I am to say that there is no objection to your putting in electric drive for the Kollegal Silk Filatures Ltd provided the equipment can be got and the cost is not excessive. A report on these points may be sent for the consideration of the Govt before the proposal is put

with effect.

Enclosures:

No. 2200 D/42 dated 1st April 1943

Sir,

Sub: War - Supplies - Production of silk - Electrification of the Government Silk Filatures and the Kollegal Silk Filatures Ltd. at Kollegal.

---

rp 7-91 a

Herewith two estimates for Rs.47,500/- and Rs. 25,700/- for the electrification of the Government Silk Filatures and the Kollegal Silk Filatures respectively at Kollegal. The former is debitable to"43 a Industries - Industries - J - Sericulture - Silk filature at Kollegal" and is to be recovered in due course from the Government of India on behalf of His Majesty's Government, while the latter is to be debited to "43 a Industries - Industries - P Kollegal Silk Filatures Ltd.," as specified in G.O.No.Ms.311 dated 12-3-43.

2. According to the proposals contained in Chief Engineer's (Electrical) letter No.5547 G/42-6 dated 24-2-43 to the Secretary to Government, Public Works Department, bulk supply from Sivasamudram hydro electric power house will be available at Kollegal at a point near the Government Silk

filatures and the H.T.feeder lines to and the step down transformer stations at the two filatures will be constructed by the Mysore Electrical Department on behalf of this department. (The H.T.feeder line and the step down transformer station for feeding the electric pump set at the Cauvery bank are not required now as the channel scheme has for the present been deferred). Necessary provision has been made in the estimates for the cost of the H.T.feeder lines and transformer stations including 18% centages payable to the Mysore Government for work executed on our behalf.

3. There will also be a small network of low tension overhead distribution lines at both the filatures for supplying the power and light requirements to the various buildings. The estimate provides for

(i) electric drive at both the filatures (please see in this connection my D.O.No.2200-D/42 dated 29-3-43).
(ii) electric lighting of the filatures and all the quarters, and
(iii) electric pump sets at the rate of one at each filature.

The estimates are based on present day prices of materials.

4. In view of the violent market fluctuations both as regards the availability and prices of electric equipment, I have in anticipation of Government sanction placed orders for some of the equipment and will be placing further orders for other equipment as soon as stocks are located. The normal procedure of advertising and inviting tenders has had to be dispensed with. I request that my action be approved and urgent sanction of the estimates be communicated to me.

Director of Industries and Commerce.

Letter No. 5547-G/42-33 dated 10th April 1943.

Govt. endt. & encls. retd. in original.

Sir,

Electrification of Government Silk Filatures and the Kollegal Silk Filatures Ltd., at Kollegal.

G.O. 10 cards

Ref: Govt. endt. No.2356-III/43-1 dated 8.4.43.

The rate of Rs.4200/- per mile of 13.2 K.V. line in item (1) and the costs of the transformers in item 2, of each of the two estimates appear reasonable. As the execution is to be done by Mysore Electricity Department, the actuals will depend on the method of constructi adopted.

2 The other items in the estimates are in the nature of lumpsum provisions not susceptible of check. They appear however generally adequate and reasonable.

3 The Govt. endt. & encls. are returned herewith.

The plans and estimates submitted by the Director of Industries & Commerce for the electrification of the Govt. Silk Filatures Factory and the Kollegal Silk Filatures at Kollegal are approved subject to the modification that centage charges in respect of the electric installation work in the two factories need not be included in the estimates. The Govt. direct that the centage charge on this account be waived.

The high tension feeder lines to and the step down transformer stations at the two Silk Filatures will be constructed by the Electrical Dept. of the Mysore Govt. on behalf of this Govt. The installation work will be in the two factories in charge of the special staff of the Asst. Electrical Engineer and the Junior Engineer appointed for the purpose.

2. Sanction is accorded to the incurring of expenditure not exceeding

(i) Rs.44,730 for the Govt. Silk Filature Factory; and

(ii) Rs.24,465 for the Kollegal Silk Filatures

in connection with the electrification schemes as per details shown in the annexures I and II to this order.

3. Sanction accorded in paragraph 2 of G.O.No. 17d/ 8.1.43 n expenditure of Rs.8,500/- for the purchase of one steam engine two pumping sets for the Govt. Silk Filatures factory at Kollegal cancelled.

4. The expenditure in respect of items specified in Annexure should be debited to "43.a. Industries - Industries - Sericulture - Govt. Silk Filature Factory at Kollegal" and that in respect of items in Annexure II to "43.a. Industries - Industries -P. Kollegal Silk Filatures" The A.G. is requested to admit the expenditure in audit pending the provision of funds later.

5. The action of the D.I. & C. in placing orders for the necessary equipmeht in anticipation of Govt. sanction is approved.

Development Department.

Sub:-Industries- Sericulture-Electrification of the Kollegal Silk Filatures and the Govt. Silk Filature Factory at Kollegal-Plans and Estimates.

Ref:- From the D.I.& C, No.2200-D/42 dated the 5th April 1943.

To Additional Secretary.

The D.I.& C has submitted for the approval of the Govt., the plans and estimates in respect of the electrification of the two Silk Filature Factories at Kollegal.

The estimates include the cost on the work of installation inside the Factories and the cost on the work of construction of H.T. Feeder lines to and the step down transforme stations at the two filatures which will be constructed by the Mysore Electricity Dept. The ~~work~~ expenditure on the work propose to be done by the Mysore Electricity Dept. including the centage charges amounts to Rs.7450 in the case of the Silk Filature Factory at Kollegal and to Rs.8050 in the case of the Kollegal Silk Filatures. The ~~expenditure~~ on the installation of electric fittings etc in the two Filatures is estimated at Rs.57,700 which includes a sum of Rs.4015 for centage and supervision charg The following remarks are called for on the proposals:-

(i) Centage charges: The centage for work done by the Mysore Electricity Dept calls for no remark; as regards the centage for the work in the two filatures, it is not stated that the Electricity Dept. will be in charge of the work. There is a special staff consisting of ( ) Asst. Electrical Engineer and one Junior Engineer employed under the D.I.& C to be in charge of the electrification of the Silk Filature Factory at Kollegal. The cost on this special staff is to be debited to the capital expenditure on the Factory, financed by H.M. Govt. in the U.K. Centages will be leviable only if the regular staff of the P.W.D. is in charge of the work and if the charges are to be debited to the Civil works budget. In the case of the Factory buildings under construction, the centages have been waived and the work is in charge of a Special Engineer under the D.I.& C. It is for consideration whether the D.I.& C will be consulted on this point and whether proportionate credit should be given to the Silk Filature Factory in respect of the time spent special staff ~~engaged~~ on the work of the Kollegal Silk Filatures

(ii) In the main file containing the letter of the Chief Engineer for Electricity on the electrification scheme at Kollegal, mention was made of the need to use 25 cycle motors or 50 cycle motors according as to which kind was available. The matter was also under discussion with Sir H.Howard. ~~The main file was circulated and has not been returned~~. It is not clear on what basis the estimates have been prepared. For orders whether the estimates will be taken to have been prepared in accordance with any oral instructions issued to the D.I.& C in the matter.

(iii) Reference is invited to the D.Os at pages 1-4 c.f. Presumably, the D.I.& C has considered the instructions issued to him in the matter, in regard to the change over to electric drive in the case of the Kollegal Silk Filatures.

(iv) Subject to orders on A at page 1 above, the case may be sent to the P.W.D. for remarks on the estimates and plans submitted by the D.I.& C. For orders.

The draft order may be accepted subject to the slight amendments in pencil in para 4 & subject to the following remarks

Each of the two Schemes of electrifcat referred to in the draft order involve an estimated expenditure exceeding Rs 10,000. As they are major works, they will have to be treated as 'new service'. Dept may therefor be requested to obtain orders in full circulat and also to take in due course H.E's authorisation for the necessary supplementa estimate.

Dep. Dep

To Addl. Secretary

This case relates to the electrification of the two Sila Kilamus at Kollegal. It is proposed to get bulk supply of power from Sivasamudram in the Mysor State for the purpose. The draft order below explains the details of the expenditure involved in the proposal. The case may be circulated for approval.

[Issued as Go No 607 Dtd 20-4-43]

payable to the Mysore Govt. between the silk filatures have been issued in O.M.No.1352-EIII/43-37 dated 2-11-43. Similar instructions in regard to the income-tax reimbursement and debit of capital expenditure etc., referred to in Finance Secy's note on p 9 ante, will have to be issued. Action will be taken after issue of orders separately, on the agreement.

P.W. Department

2. 'D' on p 43 ante. Two points were raised in the Fin.Secy's note on p 9 ante, viz., (1) reimbursement of incometax to the Mysore Govt. and (2) its debit to capital expenditure of the old and new silk factories at Kollegal etc. Item (1) is provided for in cl.13 of the Mysore Govt. draft and clause 17 of the revised draft. In para 4 of this Govt's letter No.3695-B/26-6 dated 28-4-28 forwarding the final agreement for supply of Mysore power to Mettur the reimbursement of incometax was reiterated. It is presumed that the same procedure should be adopted now.

The other item, it seems, has to be dealt with in Dev., in consultation with Fin. If approved they may be requested to take necessary further action.

3. The modified draft agreement may now be forwarded to the Resident in Mysore for obtaining the concurrence of the Mysore Govt. and of ~~the~~ H.F. the Crown Representative. A draft letter is subd. subject to orders on 'B' on p 47 above. After issue the file may be sent to Dev. for taking necessary extracts - vide X on p 47 ante.

S. Dept

To Addl A -

P.W.D have suggested that action may be taken in this dept in consultation with Fin, on the points at A & B of the Fin Secy's note at p 1 above:

A - Reimbursement of Incometax to Mysore: p 1 above

Please see cl 17 of the agreement

between the Mysore and Madras Govts re: supply of power from Sivasamudram to the Silk Filatures at Kollegal. A draft memo to the D.Z.C. is submitted for approval re: the refund of the Income tax paid by Mysore.

p 1 above

B – Cost on the Construction of feeder lines:

The expenditure on the transmission lines up to the Bulk supply point at Kollegal is to be borne by the Mysore Govt. – vide cl 3 of the agreement between the two Govts.

vide Z on p 1 cf

As regards the feeder lines from the Bulk supply point to the two Silk Filatures, the Govt. have already sanctioned the expenditure on their works and debited them to the respective heads of accounts. No further action seems necessary on this point. For orders. This memo may issue after perusal of the case by P.W.D. authorities.
